Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to frequency/band selection, classified in class 375, subclass 240.13.
 - II. Claims 7-37, drawn to phase locked looping, classified in class 375, subclass 376.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because frequency selection is not required for phase locked looping. The subcombination has separate utility such as frequency selection used in a modulator or demodulator to obtain a frequency of interest.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
